# Assumptions

**SIMULATED DATA – NOT REAL CLOUD MEASUREMENTS**

results\financial\demo\workload_assumptions.json

| parameter | value | source | note |
|---|---|---|---|
| data_mode | DEMO | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| label | SIMULATED DATA – NOT REAL CLOUD MEASUREMENTS | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| traffic_levels.low | 100,000 | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| traffic_levels.medium | 2,000,000 | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| traffic_levels.high | 20,000,000 | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| assumptions.mix.read | 0.70 | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| assumptions.mix.write | 0.20 | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| assumptions.mix.cpu | 0.10 | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| assumptions.mean_duration_seconds.read | 0.04 | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| assumptions.mean_duration_seconds.write | 0.06 | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
| assumptions.mean_duration_seconds.cpu | 0.15 | configs/cost_workloads.yaml | Snapshot; change YAML and rerun cost/export. Not a live Excel occupancy model. |
